

Naviance is a web-based software tool that allows for increased:

- Communication between counselors and students;
- Ease in college searches;
- Access to career exploration; and
- Tracking of student progress by faculty/staff.

Students can log into Naviance with a unique username and passwords from anywhere they have internet access.

Student information is extracted from the CMSD student information system and is then updated as part of the Naviance system.

All students are expected to complete the Myers-Briggs Type Indicator to help focus career exploration.

Students at each grade level are asked to perform certain tasks within Naviance.

- Seniors use Naviance to:
 - Build lists of colleges and track application progress
 - Search for scholarships
- Juniors use Naviance to:
 - Conduct career exploration
 - Prepare for the ACT
- Sophomores use Naviance to:
 - Build a résumé

CMSD partners can help by encouraging students to log onto the Naviance system and conduct college and career searches.
